

CRYOTHERAPY WORKSHOPS

Galil Medical is committed to delivering a comprehensive education and training programme that fully supports clinicians interested in providing cryoablation procedures to their patients.

As part of this programme, in 2009, we are sponsoring workshops on prostate, renal and image-guided cryoablation at six European locations.

Each workshop is directed by a leading expert in cryotherapy and will include:

- Cryobiology
- Update on latest clinical data
- Procedure overview
- Opportunity to view live procedure
- Hands-on training with 17-gauge cryoablation needles

Information/training packs will be provided to delegates at no extra cost. Certificates of attendance are provided.

Workshop agendas are subject to change. Please contact us at +44(0)1293459848 for latest programme details.

A review of cryobiology in Bristol, England.

Laparoscopic training in Bristol, England.

Image-guided cryoablation training in Strasbourg, France.
